2. Introduction

2.1 Purpose of RFP

UWIOC/GAC is seeking the services from qualified vendors to supply and deliver Human Resource Training to its Open Campus staff in Customer Service Excellence.

This RFP provides the requirements and evaluative criteria and requests detailed responses from all prospective vendors, including pricing and service descriptions, in a specified format. UWIOC/GAC will conduct a review of the responses received from this RFP.

2.2 Background Information

2.2.1 About the UWIOC

The University of the West Indies, Open Campus (UWIOC) is the newest campus of the 69-year-old University of the West Indies (The UWI). UWIOC was formally launched in Antigua & Barbuda in June 2008.

The UWIOC is an amalgamation of the previous Office of the Board for Non-Campus Countries & Distance Education (BNNCDE), the School of Continuing Studies (SCS), the UWI Distance Education Centre (UWIDEC), and the Tertiary Level Institutions Unit (TLIU).

The UWIOC offers multi-mode teaching and learning services across the Caribbean region. There are currently almost 50 UWIOC locations, including sites and offices in 16 countries, servicing 17 countries in the English-speaking Caribbean with a staff complement of just over five hundred persons.

The UWIOC has developed a unique approach to enhancing the student experience through innovative undergraduate, postgraduate and continuing/professional study programmes and courses by distance, blended, online and face-to-face learning modes in the Caribbean region.

2.2.2 Project funding by GAC

On March 27, 2013 the Global Affairs Canada (GAC), formerly Department of Foreign Affairs and Trade Development (DFATD) of Canada, and the UWIOC signed a contribution agreement for a project entitled “UWI Open Campus – Strengthening Distance Education in the Caribbean” (SDEC). This agreement will cover the period from March 27, 2013 to March 31, 2018.

Among other things, the project will create and implement new market-driven responsive Distance Education courses and programmes, and strengthen the long-term capacity of The UWI as an institution. The latter includes strengthening of both human resources and institutional infrastructure such as systems, processes and, to a very limited extent, physical facilities of the University in support of the new programmes.

Strengthening the organizational management of the Open Campus is one of the outcomes of the SDEC project, and the development of the Institutional Strengthening Plan is a result of this outcome, vis-à-vis the Technical Assistance & Training by Experts in: (1) Organisation Structure, (2) Results Management, (3) Quality Assurance, (4) Developing Public-Private Partnerships.

3. Project Description

3.1 Project Scope Overview

UWIOC/GAC is soliciting proposals from experienced and highly qualified firms to provide and deliver training to the UWIOC staff members, approximately one hundred (100), in Customer Service Excellence, as part of its Institutional Strengthening Plan.

3.2 Project Objectives

The Institutional Strengthening Plan is intended to identify and address certain weaknesses/gaps inherent in the operations of the UWIOC, in relation to structure, and the ability of the employees to cope with stress in a fast changing environment, and should result in:

1. A cadre of trained, competent staff to deliver excellent professional and quality experiences to customers;
2. Augmenting a competitive advantage in the regional and global environment; and
3. Frontline staff providing excellence in service delivery.

3.3 Project Audience

The intention of the Customer Relations programme is to equip about one hundred (100) Administrative and Technical Services (ATS) staff with the useful knowledge, behaviours and skills to enable them to consistently and competently provide excellent professional and quality experiences to customers. ATS are usually the first encountered at the UWIOC and the service they deliver is critically important to the services offered by the institution. Therefore, the key to achieving and sustaining business success at the UWIOC is its ability to care for its customers. The UWIOC recognizes in order to survive in this increasingly competitive regional and global environment; it has to be more innovative and efficient. The OC can distinguish itself by providing excellence, one of its values, in service delivery. Training of ATS staff is envisioned to be a Customer Experience journey that has more impact than just an understanding of customer service to meet the needs of the UWIOC continually evolving and diverse environment.

3.4 Project Outcomes

The Provider will be expected to

- Train approximately one hundred (100) members of the Administrative and Technical Services Staff (ATSS) in Customer Service Excellence at a professional level to learn about delivering Customer Experience Management that enables the highest level of internal or external customer interaction; to help them improve

the customer-oriented environment at the Open Campus.

At the end of the training, the participants should be able to:

- Learn and acquire the necessary knowledge and competencies to provide enhanced professional and quality experiences to customers.
- Recognize the importance of service excellence as a key business differentiator that is critical for the service of Education at the UWI
- Make meaningful contributions to the development of the UWIOC business processes which enhance customer experience
- Discuss the difference between customer service and customer experience journey
- Apply learnt communication techniques in responding to customers professionally
- Explain how attitudes and behaviours affect service delivery
- Use service recovery response strategies to manage dissatisfied and difficult customers
- Manage customer expectations and complaints
